MATEJA MILOVANOVIC

Software Engineer | Angular/Java/Spring MVC Expert

milovanovic.mateja11@gmail.com - linkedin.com - (647) 970 5122

SUMMARY

Innovative Software Engineer with a robust background in designing, maintaining and deploying complex software solutions. Over 5 years of experience developing a suite of modern applications with a specialization in Angular, Java, Spring MVC, and MySQL.

EXPERIENCE

Software Consultant - Capital Markets
Lexington Innovations
November 2022 - Present
Toronto, Ontario

- Engineered a real-time precious metals trading application using Angular, Java, and Spring MVC, allowing client transaction capabilities through an RFQ system.
- Utilized Kafka for EDA to develop an application with enhanced horizontal scalability.
- Created an RBAC system leveraging JWT and Spring Security for custom role based client views and API access for over 500 clients.
- Developed a custom GUI using Angular and SockJS websockets for blistering fast performance and 40% better loading times.
- Designed a containerized CI/CD pipeline for deploying to AWS EKS, increasing deployment speed and frequency by 70%.
- Managed a team of 5 software engineers through weekly scrum calls, Jira ticket allocation, and approval/review of PR's on Github.

Software Developer
Harmari by LTAS Technologies
November 2021 - November 2022
Toronto, Ontario

- Re-engineered the existing frontend using Angular 13 to improve performance by 100% for services including short term rental compliance and classified ad searching.
- Implemented custom ETL scripts for canadian retail stores with over 5,000,000 product variations using Python, Pandas, Beautiful Soup and Selenium.
- Built custom API/GUI testing workflows using Playwright to automate bug reports, speed tests, and web-app security.

Website/Statistics Project Specialist
CDRCP
June 2021 - November 2021
Toronto, Ontario

- Created the InfoPeel website, utilizing Wordpress along with custom PHP, Javascript, and HTML.
- Automated Peel event integration with Wordpress achieving a 500% speed increase.
- Implemented SEO best practices and speed optimizations to increase visitor rate by 100%.

Customer Service Representative
TD Canada Trust
June 2018 - June 2019
Toronto, Ontario

- Delivered exceptional customer service handling transactions and advising clients on various financial products and services.

SKILLS

Java · Spring MVC · Angular 17
Typescript · Javascript · HTML5
CSS · CI/CD · RESTful APIs
Kafka · RxJS · MySQL
AWS · Python · Selenium
Playwright · Redis · Websockets

PROJECTS

Real Estate Data Mining/ETL
Avenu Insights & Analytics (2023)

- Designed web scrapers for 9 real estate websites averaging 500ms for total data collection per page.
- Leveraged techniques like multithreading, using VPNs, and smart headless browsers with Playwright to improve async scraping efficiency by 700%.

Stock Market Database
Ryerson University (2021)

- Utilized MySQL for complex data queries and analysis.
- Developed derivative trade risk models for informed trading decisions.

EDUCATION

Bachelor of Computer Engineering
Ryerson University (2017 - 2021)

CERTIFICATES

Foundations of Data - Google

Preparing Data for Exploration - Google
